

Identification and nomenclature.....	6-16
Inor repair.....	7-8
Inspect and repack (I&R).....	1-7
Inspection.....	5-2, 5-16
Inspection process.....	7-2
Installing the needle and threading the machine.....	6-21

L

Lead seals and seal thread.....	6-8
Lexan®.....	3-20
Line attachments.....	7-6
Line dump.....	4-8
Lines.....	7-5
Line separator (suspension line holder).....	6-7
Line strip.....	4-8
Links.....	7-5
Locking pull-up cord.....	6-5
Lower leg strap shortening.....	7-54

M

Machine maintenance.....	6-23
Magnum® pilot chute.....	2-17
Main and reserve closing loop manufacture.....	7-80
Main container side flap replacement.....	7-46
Main deployment bag.....	7-82
Main deployment bag repair—closing flap grommet pullout.....	7-72
Main parachute canopy.....	2-2
Main pilot chute.....	4-9
Main riser 3-ring locking loop replacement.....	7-62
Main riser steering toggle Velcro® replacement.....	7-64
Major repair.....	7-8
Manufacturing.....	7-80, 7-86
Master Parachute Rigger.....	1-2
Material repair and grommet replacement.....	7-43
Materials.....	2-6, 7-14
Materials storage area.....	6-28
Miscellaneous.....	3-26
Modern design concepts.....	2-8
Hesitator loop configuration.....	2-8
Nonrestrictive corners.....	2-8
Molar strap.....	6-5

N

Navy end tab.....	6-9
Needle feed machine.....	6-20
Needle-nose pliers.....	6-11
Needles.....	6-20
Nomenclature.....	2-5
Non-continuous line method.....	7-34

Note pad.....	6-8
Nylon.....	3-2

O

Office area.....	6-27
Operation.....	2-19, 6-21
Operational theory.....	2-6

P

Packing.....	5-19
Packing data card.....	6-8
Packing fid.....	6-5
Packing paddle.....	6-5
Parachute loft.....	6-24
Cutting table.....	6-27
Harness table and machines.....	6-27
Metal working area.....	6-27
Packing and inspection area.....	6-25
Work area including layout tables and sewing machines.....	6-26
Parachute rigger.....	1-1
Parachute Rigger Certificates.....	1-2
Parachute service life.....	1-9
Performance standards.....	1-5
Pilot chute and bridle.....	5-8
Pilot chute and free bag/bridle.....	5-13
Pilot chute attachment.....	7-6
Pilot chute locking rod.....	6-6
Pilot chutes.....	2-17
Hand deploy design.....	2-17
Spring-loaded design.....	2-17
Pilot chute threading tool.....	6-6
Pilot versus parachute size.....	1-9
Plastics and synthetics.....	3-20
Pony clamps.....	6-10
Proper ram-air orientation (PRO) packing.....	4-2
Pull-up cords.....	6-5

R

Ram-air reserve canopy.....	5-13
Ram-air reserve into a sport piggyback system.....	5-28
Ram-air reserve into a two-pin piggyback.....	5-38
Ram-air reserves and sport piggyback systems.....	5-13
Rawhide mallet.....	6-13
Record keeping.....	1-7
Removal of bloodstains.....	7-10
Removal of fresh water.....	7-10
Removal of mildew.....	7-10
Removal of perspiration.....	7-10
Removal of petroleum products.....	7-10
