

Format	Description	Added, Deprecated, or Removed
<code>--ndb-mgmd-host=connection-string,</code>	Same as <code>--ndb-connectstring</code>	(Supported in all NDB releases based on MySQL 8.0)
<code>-c</code>		
<code>--ndb-nodeid=#</code>	Set node ID for this node, overriding any ID set by <code>--ndb-connectstring</code>	(Supported in all NDB releases based on MySQL 8.0)
<code>--ndb-optimized-node-selection</code>	Enable optimizations for selection of nodes for transactions. Enabled by default; use <code>--skip-ndb-optimized-node-selection</code> to disable	(Supported in all NDB releases based on MySQL 8.0)
<code>--no-defaults</code>	Do not read default options from any option file other than login file	(Supported in all NDB releases based on MySQL 8.0)
<code>--no-nodeid-checks</code>	Do not provide any node ID checks	(Supported in all NDB releases based on MySQL 8.0)
<code>--nodaemon</code>	Do not run ndb_mgmd as a daemon	(Supported in all NDB releases based on MySQL 8.0)
<code>--nowait-nodes=list</code>	Do not wait for management nodes specified when starting this management server; requires <code>--ndb-nodeid</code> option	(Supported in all NDB releases based on MySQL 8.0)
<code>--print-defaults</code>	Print program argument list and exit	(Supported in all NDB releases based on MySQL 8.0)
<code>--print-full-config,</code>	Print full configuration and exit	(Supported in all NDB releases based on MySQL 8.0)
<code>-P</code>		
<code>--reload</code>	Causes management server to compare configuration file with configuration cache	(Supported in all NDB releases based on MySQL 8.0)
<code>--remove[=name]</code>	Used to remove management server process that was previously installed as Windows service, optionally specifying name of service to be removed; does not apply on other platforms	(Supported in all NDB releases based on MySQL 8.0)
<code>--usage,</code>	Display help text and exit; same as <code>--help</code>	(Supported in all NDB releases based on MySQL 8.0)
<code>-?</code>		
<code>--skip-config-file</code>	Do not use configuration file	(Supported in all NDB releases based on MySQL 8.0)
<code>--verbose,</code>	Write additional information to log	(Supported in all NDB releases based on MySQL 8.0)
<code>-v</code>		
<code>--version,</code>	Display version information and exit	(Supported in all NDB releases based on MySQL 8.0)
<code>-V</code>
