

D(x) [...]	with equal	within the	word the	yet there
	with greater	within the union	worse than	yet what
	with many	within their	would at	you make
	with mutual	within which	would be	you render
	with personal	without property	would be differently	you render him
	with success	without taking	would be unwise	you take
	with which	without violating	would certainly	zeal for
	with which they	without which	yet the	zeal in

Figure 1: Subset from a dictionary $D(x)$ extracted from a sample text x belonging to the Federalist dataset.
