

base

Establish IS-A relationship with base class at compile time

bigint

Transparent BigInteger support for Perl

bignum

Transparent BigNumber support for Perl

bigrat

Transparent BigNumber/BigRational support for Perl

blib

Use MakeMaker's uninstalled version of a package

bytes

Force byte semantics rather than character semantics

charnames

Define character names for `\N{named}` string literal escapes

constant

Declare constants

diagnostics

Produce verbose warning diagnostics

encoding

Allows you to write your script in non-ascii or non-utf8

fields

Compile-time class fields

filetest

Control the filetest permission operators

if

use a Perl module if a condition holds

integer

Use integer arithmetic instead of floating point

less

Request less of something from the compiler

lib

Manipulate `@INC` at compile time

locale

Use and avoid POSIX locales for built-in operations

open

Set default PerlIO layers for input and output

ops

Restrict unsafe operations when compiling
