

“Since the company’s formation, Jones Energy has strived to be the premier E&P company in the US Midcontinent. As we enter our new chapter as a public company, this remains the foundation for all we do.”

In 2014, we will continue to execute our tactical plans within the Anadarko and Arkoma basins. We see the potential for the Tonkawa formation in the Anadarko Basin to provide upside opportunities along with additional scale in the Woodford formation. We will continue to evaluate acquisition opportunities within our existing footprint, but may also pursue opportunities outside our core operating area. But we make this commitment to you: Regardless of our expansion plans, our growth will be purposeful and deliberate—grounded in our strategy to only operate where we can be best in class. We will not overpay for assets. We will stay true to our tradition.

Since the company’s formation, Jones Energy has strived to be the premier E&P company in the US Midcontinent. As we enter our new chapter as a public company, this remains the foundation for all we do.

We started as a small family business over 25 years ago. Even today, my family and our management team own close to 30% of the outstanding shares. But our goal remains the same: to create long-term value for our shareholders. We think we have a wonderful foundation to deliver on that proposition.

We look forward to reporting our progress in the coming years. Thank you for your support.

Yours truly,

JONNY JONES

Founder, Chairman & CEO
Jones Energy
