

Figure 11-40 Creating a FlashCopy mapping

3. Select a volume in the source volume column by using the drop-down menu. Then, select a volume in the target volume column by using the drop-down menu. Click **Add**, as shown in Figure 11-41.

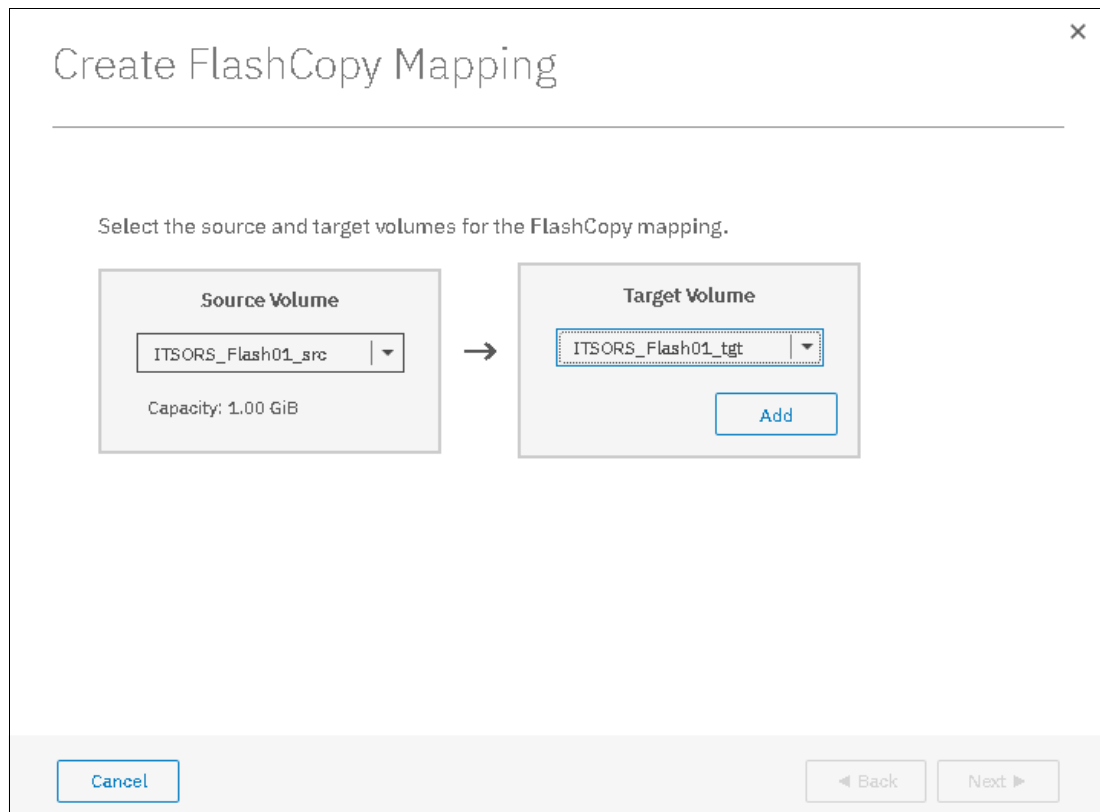

Figure 11-41 Select source and target volumes for the FlashCopy mapping

Repeat this step to create other mappings. To remove a mapping that was created, click **X**. Click **Next**.

Important: The source and target volumes must be of equal size. Therefore, only the targets with the appropriate size are shown for a source volume.

Volumes that are target volumes in another FlashCopy mapping cannot be target of a new FlashCopy mapping. Therefore, they do not appear in the list.
