

Figure 22. Letter which contain a Page Segment

---

## Working with Overlays

This function allows you to:

- Copy an overlay object in a library
- Delete overlay objects in a library
- Print an overlay in a library
- Rename an overlay in a library
- Display the description of the overlay object
- Change the description text of the overlay object
- Convert an overlay to a physical file member

### Copying an Overlay

This function calls the CL command **CRTDUPOBJ** and copies an overlay object to a new one.

### Deleting an Overlay

This function calls the CL command **DLTOVL** and deletes the specified overlay.
