

## AIRSPACE INFORMATION (Continued)

### Off Route Obstruction Clearance Altitude (OROCA)

*Low Charts Only* OROCA is computed similarly to the Maximum Elevation Figure (MEF) found on Visual charts except that it provides an additional vertical buffer of 1,000 feet in designated non-mountainous areas and a 2,000 foot vertical buffer in designated mountainous areas within the United States.

Example: 12,500 feet

12<sup>5</sup>

Example: Low L-13 Chart
