

d. Click **Test Connection** and then click **Finish**, as shown in Figure 4-12.

The screenshot shows the 'IBM FileNet Configuration Manager for Content Platform Engine' window. A sub-dialog titled 'Upgrade Configuration Profile' is open, with the tab 'Content Platform Engine Task'. The dialog is titled 'Set Properties for WebSphere Application Server' and contains the following fields and controls:

- Application server version: \* (8.5)
- Application server installation directory: \* (C:\Program Files\IBM\WebSphere\AppServer) [Browse...]
- Application server profile directory: \* (C:\Program Files\IBM\WebSphere\AppServer\profiles\AppSvc) [Browse...]
- Application server administrator user name: \* (P8Admin)
- Application server administrator password: \* (masked) Confirm: (masked)
- Application server SOAP port: \* (8880)
- Application server host: \* (localhost)
- Application server cell: \* (P8Node01Cell)
- Application server transaction timeout: \* (180)
- ☐ Use SSL certificates for server communication ?
- Test Connection ?
- \* denotes a required field

At the bottom of the dialog are four buttons: '< Back', 'Next >', 'Finish', and 'Cancel'.
