
F. Revenues and Revenue Recognition

The Company derives its revenues from three principal sources: airfreight, ocean freight and customs brokerage and import services and these are the revenue categories presented in the financial statements.

As a non-asset based carrier, the Company does not own transportation assets. Rather, the Company generates the major portion of its air and ocean freight revenues by purchasing transportation services from direct (asset-based) carriers and reselling those services to its customers. The difference between the rate billed to customers (the sell rate), and the rate paid to the carrier (the buy rate) is termed "Net Revenue" or "yield". By consolidating shipments from multiple customers and concentrating its buying power, the Company is able to negotiate favorable buy rates from the direct carriers, while at the same time offering lower sell rates than customers would otherwise be able to negotiate themselves.

Airfreight revenues include the charges to the Company for carrying the shipments when the Company acts as a freight consolidator. Ocean freight revenues include the charges to the Company for carrying the shipments when the Company acts as a Non-Vessel Operating Common Carrier (NVOCC). In each case the Company is acting as an indirect carrier. When acting as an indirect carrier, the Company will issue a House Airway Bill (HAWB) or a House Ocean Bill of Lading (HOBL) to customers as the contract of carriage. In turn, when the freight is physically tendered to a direct carrier, the Company receives a contract of carriage known as a Master Airway Bill for airfreight shipments and a Master Ocean Bill of Lading for ocean shipments. At this point, the risk of loss passes to the carrier, however, in order to claim for any such loss, the customer is first obligated to pay the freight charges.

Based upon the terms in the contract of carriage, revenues related to shipments where the Company issues an HAWB or an HOBL are recognized at the time the freight is tendered to the direct carrier at origin. Costs related to the shipments are also recognized at this same time.

Revenues realized in other capacities, for instance, when the Company acts as an agent for the shipper, and does not issue an HAWB or an HOBL, include only the commissions and fees earned for the services performed. These revenues are recognized upon completion of the services.

Customs brokerage and import services involves providing services at destination, such as helping customers clear shipments through customs by preparing required documentation, calculating and providing for payment of duties and other taxes on behalf of the customers as well as arranging for any required inspections by governmental agencies, and arranging for delivery. This is a complicated function requiring
