

117.1	SYNOPSIS	1572
117.2	DESCRIPTION	1572
117.2.1	Target	1572
117.2.2	Other OSes	1573
117.2.3	Prerequisites	1573
117.2.4	Starting Perl programs under OS/2 (and DOS and...)	1574
117.2.5	Starting OS/2 (and DOS) programs under Perl	1575
117.3	Frequently asked questions	1575
117.3.1	"It does not work"	1575
117.3.2	I cannot run external programs	1576
117.3.3	I cannot embed perl into my program, or use <i>perl.dll</i> from my program.	1576
117.3.4	" and pipe-open do not work under DOS.	1576
117.3.5	Cannot start find.exe "pattern" file	1576
117.4	INSTALLATION	1577
117.4.1	Automatic binary installation	1577
117.4.2	Manual binary installation	1577
117.4.3	<b>Warning</b>	1579
117.5	Accessing documentation	1579
117.5.1	OS/2 .INF file	1579
117.5.2	Plain text	1580
117.5.3	Manpages	1580
117.5.4	HTML	1580
117.5.5	GNU info files	1580
117.5.6	PDF files	1580
117.5.7	LaTeX docs	1581
117.6	BUILD	1581
117.6.1	The short story	1581
117.6.2	Prerequisites	1581
117.6.3	Getting perl source	1582
117.6.4	Application of the patches	1583
117.6.5	Hand-editing	1583
117.6.6	Making	1583
117.6.7	Testing	1583
117.6.8	Installing the built perl	1584
117.6.9	a.out-style build	1584
117.7	Building a binary distribution	1585
117.8	Building custom .EXE files	1587
117.8.1	Making executables with a custom collection of statically loaded extensions	1587
117.8.2	Making executables with a custom search-paths	1588
117.9	Build FAQ	1590
117.9.1	Some / became \ in pdksh.	1590
117.9.2	'errno' - unresolved external	1590
117.9.3	Problems with tr or sed	1590
117.9.4	Some problem (forget which ;-)	1590
117.9.5	Library ... not found	1591
117.9.6	Segfault in make	1591
117.9.7	op/sprintf test failure	1591
117.10	Specific (mis)features of OS/2 port	1591
117.10.1	setpriority, getpriority	1591
117.10.2	system()	1591
117.10.3	extproc on the first line	1592
117.10.4	Additional modules:	1592
117.10.5	Prebuilt methods:	1592
117.10.6	Prebuilt variables:	1594
117.10.7	Misfeatures	1594
117.10.8	Modifications	1595
