

6. In the System Name window, enter the system name and click **Apply and Next**, as shown in Figure 2-27.

The screenshot shows the 'System Setup' window with a sidebar on the left containing a list of steps: Welcome, License Agreement, Change Password, System Name (selected), Licensed Functions, Date and Time, Encryption, System Location, Contact, Inventory Settings, Email Servers, Storage Insights, Support Assistance, Remote Support Proxy, Access Settings, and Summary. The main area is titled 'System Name' and contains the text 'Enter a name for the system:' followed by a text input field containing 'mcr-1-bacci-21'. At the bottom, there are three buttons: 'Cancel', 'Back', and 'Apply and Next'.

Figure 2-27 Setup wizard: System Name

Note: Use the `chsystem` command to modify the attributes of the clustered system. This command can be used any time after a system is created.
