

## sasol petroleum international

Fanie Roets conducts an early morning toolbox safety talk at the central processing facility at Temane in Mozambique.

## highlights

- Stable gas production in Mozambique, while increasing future capacity
- World-class safety performance
- Increased exploration portfolio
- Developing non-conventional gas portfolio and competence

| <b>Financial</b>                       |    | % change | 2010 | 2009  |

### Environmental

In 2010, our upstream oil and gas exploration and production activities resulted in the direct emission of 0,1 Mt of the greenhouse gas, carbon dioxide. Total water use in 2010 was 0,1 million cubic metres (Mm<sup>3</sup>).
