

The following table summarizes the impact of a 1% change in the foreign exchange rates of the Canadian dollar against the US dollar (USD) on the financial assets and liabilities of the Company.

	CARRYING AMOUNT (USD)	FOREIGN EXCHANGE RISK (USD)	
		-1% EARNINGS & EQUITY	+1% EARNINGS & EQUITY
Financial assets			
Accounts receivable	254,623	2,546	(2,546)
Financial liabilities			
Accounts payable and accrued liabilities	27,436	(274)	274
Total increase (decrease)		2,272	(2,272)

The carrying amount of accounts receivable and accounts payable and accrued liabilities in USD represents the Company's exposure at December 31, 2012.

2. Interest rate risk

The Company has minimal interest rate risk because its long-term debt is a fixed rate of 3.71%.

3. Share price risk

- Ceapro's share price is subject to equity market price risk, which may result in significant speculation and volatility of trading due to the uncertainty inherent in the Company's business and the technology industry.
- There is a risk that future issuance of common shares may result in material dilution of share value, which may lead to further decline in share price. The expectations of securities analysts and major investors about our financial or scientific results, the timing of such results, and future prospects, could also have a significant effect on the future trading price of Ceapro's shares.

4. People and process risk

A variety of factors will affect Ceapro's future growth and operating results, including the strength and demand for the Company's products, the extent of competition in our markets, the ability to recruit and retain qualified personnel, and the ability to raise capital.

Ceapro's consolidated financial statements are prepared within a framework of IFRS selected by management and approved by the Board of Directors. The assets, liabilities, revenues, and expenses reported in the consolidated financial statements depend to varying degrees on estimates made by management. An estimate is considered a critical accounting estimate if it requires management to make assumptions about matters that are highly uncertain and if different estimates that could have been used would have a material impact. The significant areas requiring the use of management estimates relate to provisions made for inventory valuation, amortization of property and equipment, tax liabilities and tax assets, provisions, the assumptions used in determining share-based compensation, the interest rates used in determining the employee future benefits obligation, and the estimated sales projections to value the royalty financial liability. These estimates are based on historical experience and reflect certain assumptions about the future that we believe to be both reasonable and conservative. Actual results could differ from those estimates. Ceapro continually evaluates the estimates and assumptions.

i) Loss of key personnel

Ceapro relies on certain key employees whose skills and knowledge are critical to maintaining the Company's success. Ceapro has procedures in place to identify and retain key employees and always attempts to be competitive with compensation and working conditions. The current robust economy in Alberta does increase these risks.

ii) Interruption of raw material supply

Interruption of key raw materials could significantly impact operations and our financial position. Interruption of supply could arise from weather related crop failures or from market shortages. Ceapro attempts to purchase key raw
