

Field Name	Description
Color	<p>Specifies the color used to print the text. The default value is *DEFAULT. It is the printer default color.</p> <p><b>Notes:</b></p> <ol style="list-style-type: none"> <li>1. Not all printers support the color printing function. You are not allowed to enter a value in the <i>Color</i> prompt if the printer does not support color printing.</li> <li>2. If the printer does not support the color you select, an error occurs or a default color is used when this text is printed. You should check which colors are supported on the printer.</li> </ol>
Underline	<p>Specifies whether or not text is printed with an underline.</p> <p><b>Y (Yes)</b> An underline is printed.</p> <p><b>N (No)</b> No underline is printed.</p> <p>An underline starts at the beginning of the text data, which includes left blank characters and blanks between characters if they exist. An underline stops at the end of the text data.</p> <p><b>Notes:</b></p> <ol style="list-style-type: none"> <li>1. Not all printers support this function. You are not allowed to enter the value if the printer does not support this function.</li> <li>2. To use underline, you should be aware of the following: <ul style="list-style-type: none"> <li>• If your printer type is 4, 5, or 6, you must specify font type 1 or 3.</li> <li>• If your printer type is one of the others, there are no restrictions.</li> </ul> </li> </ol>
Overstrike	<p>Specifies a single SBCS character in the <i>Overstrike</i> prompt to type over on all characters in the defined text data including blank character(s). If DBCS characters exist in that text, the characters are not typed over.</p> <p><b>Notes:</b></p> <ol style="list-style-type: none"> <li>1. Not all printers support this function. You are not allowed to enter the value if the printer does not support this function.</li> <li>2. To use overstrike, you should be aware of the following: <ul style="list-style-type: none"> <li>• If your printer type is 4, 5, or 6, you must specify font type 1 or 3.</li> <li>• If your printer type is one of the others, there are no restrictions.</li> </ul> </li> </ol>
Font	<p>Specifies a font number. A font number is 1 to 8, and *DEFAULT. Each number or *DEFAULT is defined in the Work with Source Overlay Fonts or the Work with PFD Definition Fonts display. You can see the list of fonts and select one of them by placing the cursor in this field and pressing F4. See 248 for details.</p> <p><b>Notes:</b></p> <ol style="list-style-type: none"> <li>1. It is not checked if the specified font exists and is a SBCS font. If it does not exist, some errors may occur when this text is printed. If you specify a DBCS font, the result is unpredictable. Some unexpected characters may be printed, or some errors may occur.</li> <li>2. *DEFAULT no longer indicates to use the default font of the printer. When *DEFAULT is different from what you want, change it on the Work with Source Overlay Fonts display or the Work with PFD Definition Fonts display.</li> </ol>
