

Figure 5-88. Lines are taut in the center.

Figure 5-89. Fold tail back for wind channel.

Figure 5-90. "S" fold drawing.

11. Pull the top center cell panel down to the bottom of the stack.

Figure 5-91. Packing paddle at $\frac{1}{3}$ rd location.

Figure 5-92. Creating the "S" fold.

12. Wrap the center cell around the folded canopy with the left and right about halfway to the center, then secure with clamps starting at the bottom. [Figure 5-93] The width of the folded canopy should be the width of the D-bag plus 2 inches (5cm).
13. Continue to wrap the center cell around the canopy stack and secure with additional clamps. [Figure 5-94]

Step 5. Placing the Canopy into the Deployment Bag and Stowing the Lines

1. Lift the base of the folded canopy and slide the reserve bag underneath. The grommets in the tongue of the bag should be even with the bottom of the stack. [Figure 5-95]
2. Make a second "S" fold to match Figure 5-96.
3. Split the loose fabric at the top to form two "ears." [Figure 5-97]
4. Gather the center cell material along the middle seam until you reach the bottom. Roll the material under, but do not cover the center cell. [Figure 5-98]
