

*Cash and due from banks, other securities, other short-term investments, deposits, federal funds purchased and other short-term borrowings*

For financial instruments with a short-term or no stated maturity, prevailing market rates and limited credit risk, carrying amounts approximate fair value. Those financial instruments include cash and due from banks, FHLB and FRB restricted stock, other short-term investments, certain deposits (demand, interest checking, savings, money market and foreign office deposits), and federal funds purchased. Fair values for other time deposits, certificates of deposit \$100,000 and over and other short-term borrowings were estimated using a discounted cash flow calculation that applied prevailing LIBOR/swap interest rates for the same maturities.

*Held-to-maturity securities*

The Bancorp's held-to-maturity securities are primarily composed of instruments that provide income tax credits as the economic return on the investment. The fair value of these instruments is estimated based on current U.S. Treasury tax credit rates.

*Loans held for sale*

Fair values for commercial loans held for sale were valued based on executable bids when available, or on discounted cash flow models incorporating appraisals of the underlying collateral, as well as assumptions about investor return requirements and amounts and timing of expected cash flows. Fair values for other consumer loans held for sale are based on contractual values upon which the loans may be sold to a third party, and approximate their carrying value.

*Portfolio loans and leases, net*

Fair values were estimated by discounting future cash flows using the current market rates of loans to borrowers with similar credit characteristics and similar remaining maturities.

*Long-term debt*

Fair value of long-term debt was based on quoted market prices, when available, or a discounted cash flow calculation using LIBOR/swap interest rates and, in some cases, a spread for new issues for borrowings of similar terms.
