Selecting DAB Stations

DISPLAY —

◄◄/►►

**Use the Fast Reverse and Fast Forward [◄◄]/[►►] buttons to select the DAB stations.**

If a secondary service is available, a right angle bracket (>) is displayed.
Press the Fast Forward [►►] button to listen to the secondary service.

```
▶◄◄    DAB
  BBC5Live>
```

While the secondary service is selected, a left angle bracket (<) is displayed.
Press the Fast Reverse [◄◄] button to return to the primary service.

```
▶◄◄    DAB
  BBC5Live<
```

When you select a station that you've selected a lot in the past, the letter F (short for Favorite) is displayed.

```
▶◄◄    DAB
 >BBC5Live F
```
                              "F"

If you select a station that cannot be received properly, a question mark (?) is displayed.

```
        DAB
 >BBC5Live   ?
```
                              "?"

• You can also use the multi control to select DAB stations.

• Once a DAB station has been preset, these front panel controls will select presets, in Preset mode. To use them to select DAB stations, select DAB as the input source, and then press the Stop [□] button for 3 seconds until "Station Mode" appears on the display.

Displaying DAB Radio Information

Press the remote controller's [DISPLAY] button repeatedly to display more information about the selected DAB station.

1. DLS (Dynamic Label Segment)
