```
oc adm manage-node  wrknode01.domain.example.com  --schedulable=true
NAME                              STATUS    ROLES     AGE       VERSION
wrknode01.domain.example.com   Ready      compute   3h        v1.11.0+d4cacc0
oc adm manage-node  wrknode02.domain.example.com  --schedulable=true
NAME                              STATUS    ROLES     AGE       VERSION
wrknode02.domain.example.com   Ready      compute   3h        v1.11.0+d4cacc0
```

19. Remove the compute label from the OpenShift Master-Infrastructure node:

```
oc label node mstnode01.domain.example.com
node-role.kubernetes.io/compute=false --overwrite
node/mstnode01.domain.example.com labeled
```

20. Use the URL (*https://icp-console.apps.domain.example.com:443*) to connect to the IBM Multicloud Manager management console as shown in Figure 6-7.

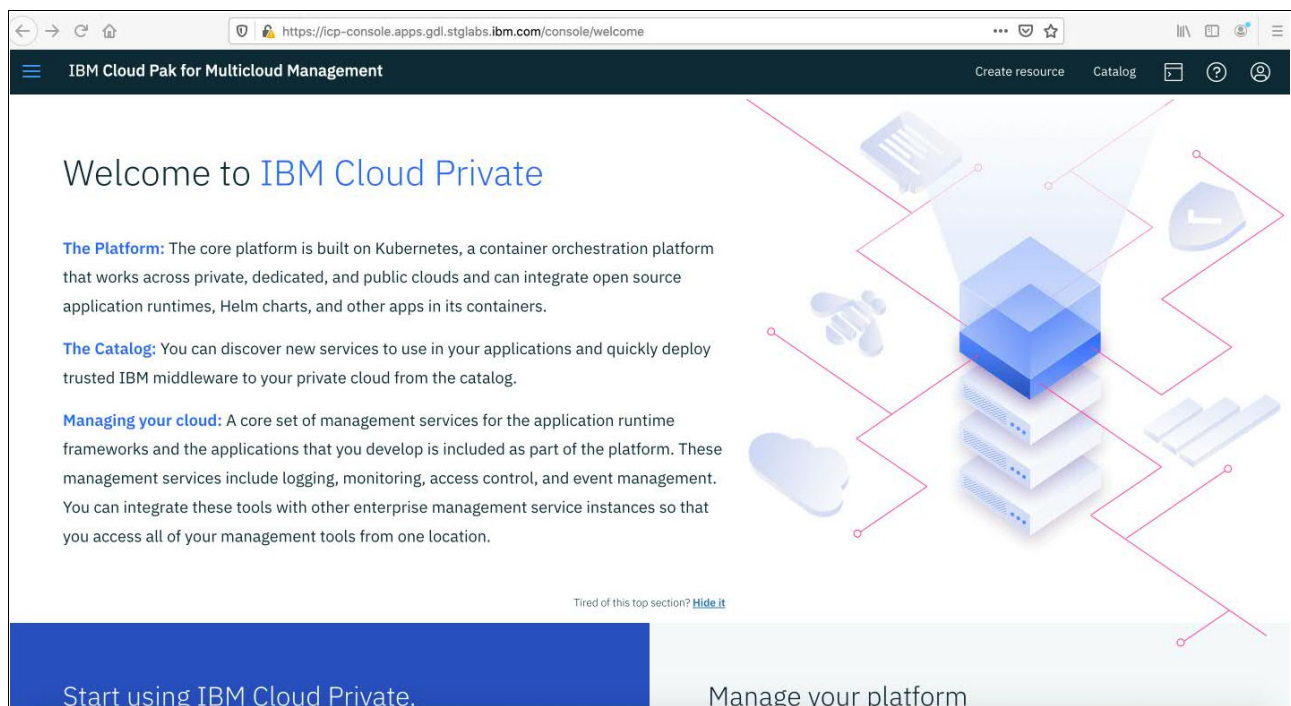

Figure 6-7   IBM Cloud Private console

You can find more details about IBM Cloud Pak for Multicloud Management installation at the following website:
