## Displaying MP3/WMA/AAC Information

You can display various information about the MP3/WMA/AAC files currently playing, including ID3 tags such as title, artist name, and album name.

DISPLAY

During playback, press the [DISPLAY] button repeatedly to display the following music file information.
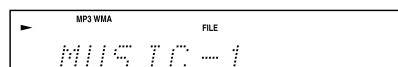

Elapsed time:
The length of time that the current MP3, WMA or AAC file has been playing (default display). If the elapsed time is more than 99 minutes and 59 seconds, "– –:– –" is displayed.
